

# SUSTAINABLE PACKAGING

## FROM JOHNSONS WORKWEAR

**At Johnsons Workwear, we're proud to support UK businesses in reducing plastic packaging with our sustainable, reusable alternatives — all part of doing things The Johnsons Way.**

We've launched a range of washable and reusable laundry bags, cloth bags, and lower-impact micron polythene bags, designed to replace single-use plastic in commercial laundry — all provided to customers at no extra cost.

### Why make the switch?

Using washable laundry bags instead of single-use plastic prevents thousands of bags from ending up in landfill. Ideal for both rental and launder-only customers, these bags come in a range of sizes and colours, making them easy to track and handle. They're washed and maintained alongside your garments, ensuring high hygiene standards are upheld at every step.

We've also introduced washable mesh bags for workplace services like wipers and cleaning cloths — helping eliminate the need for disposable bags whilst maintaining a simple, clean swap system.

### Benefits of our washable laundry bags:

- Reduce single-use plastic waste
- Lower packaging costs
- Support your ESG and sustainability goals
- Streamline handling with size and colour-coding
- Boost customer trust and brand reputation
- Guaranteed hygiene – tested and approved

# SUSTAINABLE PACKAGING

FROM JOHNSONS WORKWEAR

## What about hygiene compliance?

We know hygiene is non-negotiable — especially in sectors like healthcare, food production, and clean manufacturing. That's why our washable laundry bags have been rigorously tested to ensure they meet the same high standards you already expect from Johnsons Workwear.

During testing, we found no impact on microbiological or allergen safety when garments were packed in zipped, reusable bags instead of single-use plastic. That means garments arrive just as clean, safe, and compliant — with zero compromise on hygiene.

And, if a laundry bag is ever damaged in a way that could affect its cleanliness or performance, it's immediately removed from service and either repaired or responsibly recycled through our garment recycling programme.

## Lets talk plastic-free packaging

**We're already seeing the impact, with a 20% drop in single-use plastic consumption in just a year — and we're just getting started.**

Whether you're ready to switch or simply exploring greener workwear options, Johnsons Workwear is here to help.

Customer Service Executive today to find out more.**

## Still need plastic?

For customers not yet ready to go fully reusable, we're trialling micron polythene bags — lighter and less resource-heavy than traditional options. They're a stepping stone, not a long-term fix, and while recyclable in some areas, they aren't biodegradable — making reuse our ultimate goal.
